Progress Toward Completion of the Mathematics Major

Applied Mathematics Concentration

Arts and Sciences students may be admitted to the math major after successfully completing a semester of multivariable calculus, a semester of linear algebra, and a 3- or 4-credit computer programming course. To apply, visit math.cornell.edu/major.

Math majors must complete **9 courses** for the major, as described in items 1–3 below, with a **minimum grade of C–**. No course may be used to satisfy more than one requirement. MATH courses numbered between 4980 and 5999 do not count.

1. **Two Courses in Algebra.** ( ___ transfer credit applied, see reverse)

   - MATH 3320 - Introduction to Number Theory
   - MATH 3340 - Abstract Algebra*
   - MATH 3360 - Applicable Algebra*
   - MATH 4310 - Linear Algebra*  
   - MATH 4330 - Honors Linear Algebra*
   - MATH 4340 - Honors Introduction to Algebra*
   - MATH 4370 - Computational Algebra
   - MATH 4500 - Matrix Groups
   - MATH 4560 - Geometry of Discrete Groups

1. **Two Courses in Analysis.** ( ___ transfer credit applied, see reverse)

   - MATH 3110 - Introduction to Analysis*
   - MATH 3210 - Manifolds & Differential Forms  
   - MATH 3270 - Introduction to Ordinary Differential Equations*
   - MATH 4130 - Honors Intro Analysis I*
   - MATH 4140 - Honors Intro Analysis II
   - MATH 4180 - Complex Analysis*
   - MATH 4200 - Differential Equations and Dynamical Systems*
   - MATH 4210 - Nonlinear Dynamics and Chaos*
   - MATH 4220 - Applied Complex Analysis*
   - MATH 4250 - Numerical Analysis and Differential Equations [also CS 4210]
   - MATH 4260 - Numerical Analysis: Linear & Nonlinear Problems [also CS 4220]
   - MATH 4280 - Introduction to Partial Differential Equations*

*See course descriptions at math.cornell.edu/upper-level-courses for information on **forbidden overlaps**.
Of the 9 courses used to fulfill requirements (1), (2), (3 iii), and (3 iv) of the math major, at least one course must be taken from three of the four Groups A, B, C, and D described on the next page. Non-MATH courses in these groups may be used toward the math modeling requirement (3 iv).

3. **Concentration in Applied Mathematics.** ( ___ transfer credit applied, see below)

   Five additional courses from (iii) and (iv) below.

   (iii) At least three MATH courses numbered 3000 or above:
   
   _____
   _____
   _____
   _____
   _____

   (iv) At least one course dealing with mathematical models. Eligible courses include MATH 3610 and any course outside mathematics with serious mathematical content that deals with scientific matters. Serious mathematical content includes, but is not limited to, extensive use of calculus or linear algebra. Any course from another department that would satisfy one of the other concentrations may be used.

   _____
   _____

   At most one of the following may be used:
   
   _____ CS 2110 - Object-Oriented Programming and Data Structures [also ENGRD 2110]
   _____ PHYS 1116 - Physics I: Mechanics and Special Relativity
   _____ PHYS 2208 - Fundamentals of Physics II
   _____ PHYS 2213 - Physics II: Electromagnetism
   _____ PHYS 2217 - Physics II: Electricity and Magnetism [also AEP 2170]

   Other 1000-level physics courses and PHYS 2207 may *not* be used. AP credit may *not* be used.

---

**Transfer Credit / Study Abroad Courses Applied to the Major**

Applied Mathematics Concentration

Of the 9 courses used to fulfill requirements (1), (2), (3 iii), and (3 iv) of the math major, at least one course must be taken from three of the four Groups A, B, C, and D below.

Group A. Differential equations

- MATH 3230 - Introduction to Differential Equations* (discontinued)
- MATH 3270 - Introduction to Ordinary Differential Equations*
- MATH 4200 - Differential Equations and Dynamical Systems*
- MATH 4210 - Nonlinear Dynamics and Chaos*
- MATH 4280 - Introduction to Partial Differential Equations*

Group B. Discrete mathematics and combinatorics

- MATH 3360 - Applicable Algebra
- MATH 4370 - Computational Algebra
- MATH 4410 - Introduction to Combinatorics I
- MATH 4420 - Introduction to Combinatorics II
- MATH 4550 - Applicable Geometry
- CS 4820 - Introduction to Analysis of Algorithms
- ECON 4020 - Game Theory I
- ECON 4022 - Game Theory II
- ORIE 3300 - Optimization I
- ORIE 4350 - Introduction to Game Theory

Group C. Numerical and computational methods

- MATH 4250 - Numerical Analysis and Differential Equations [also CS 4210]
- MATH 4260 - Numerical Analysis: Linear and Nonlinear Problems [also CS 4220]
- CS 4620 - Introduction to Computer Graphics
- CS 4670 - Introduction to Computer Vision
- MAE 4700 - Finite Element Analysis for Mechanical and Aerospace Design

Group D. Probability and statistics

- MATH 4710 - Basic Probability*
- MATH 4720 - Statistics*
- MATH 4740 - Stochastic Processes
- ECON 3130 - Statistics and Probability*
- ECON 4130 - Statistical Decision Theory
- ORIE 3500 - Engineering Probability and Statistics II
- STSCI 3080 - Probability Models and Inference* [also BTRY 3080, ILRST 3080]
- STSCI 3100 - Statistical Sampling [also BTRY 3100, ILRST 3100]
- STSCI 4030 - Linear Models with Matrices [also BTRY 4030]

*See course descriptions at math.cornell.edu/upper-level-courses for information on forbidden overlaps.
