ONE-PAGE REVIEW

§8.2, §8.3 (Trigonometric Integrals), §8.5 (Partial Fractions)

MATH 1910 Recitation
October 25, 2016

(1) **Power-reducing identitites**

$$\cos^2(x) = \boxed{}^{(1)}, \qquad \sin^2(x) = \boxed{}^{(2)}$$

(2) **Reduction formula** for integrating $\sin^m(x)$ and $\cos^m(x)$.

$$\int \sin^n(x)\,dx = \boxed{}^{(3)}.$$

$$\int \cos^n(x)\,dx = \boxed{}^{(4)}.$$

To derive these formulas, use integration by parts on $\int \sin^n(x)\,dx$ with $u = \sin^n(x)\,dx$ and $dv = dx$.

(3) **Completing the square.** If you have an integral with a $1/\sqrt{ax^2+bx+c}$ in it, you need to complete the square. Rewrite

$$ax^2 + bx + c = a(x-h)^2 + k$$

where

$$h = \boxed{}^{(5)}, \qquad k = \boxed{}^{(6)}$$

(4) **Partial Fractions:** if you have an expression that looks like

$$\frac{f(x)}{(x-a_1)(x-a_2)\cdots(x-a_n)}$$

where there are no repeats in the a_i's, then you can write

$$\frac{f(x)}{(x-a_1)(x-a_2)\cdots(x-a_n)} = \frac{A_1}{x-a_1} + \frac{A_2}{x-a_2} + \ldots + \frac{A_n}{x-a_n}$$

If there are repeats in the a_i's, then $(x-a)^n$ contributes

$$\frac{A_1}{x-a} + \frac{A_2}{(x-a)^2} + \ldots + \frac{A_n}{(x-a)^n}.$$

And $(x^2+b)^n$ contributes

$$\frac{A_1x+B_1}{x^2+b} + \frac{A_2x+B_2}{(x^2+b)^2} + \ldots + \frac{A_nx+B_n}{(x^2+b)^n}.$$

PRACTICE PROBLEMS

§8.2, §8.3 (Trigonometric Integrals), §8.5 (Partial Fractions)

MATH 1910 Recitation
October 25, 2016

(1) For each of the following integrals, should you use substitution, integration by parts, trig substitution, partial fractions, or something else?

(a) $\int \ln(x)\,dx$

(b) $\int \sqrt{4x^2-1}\,dx$

(c) $\int \frac{x}{\sqrt{12-6x-x^2}}\,dx$

(d) $\int \sqrt{4x^2-1}\,dx$

(e) $\int \sin^3(x)\cos^3(x)\,dx$

(f) $\int x\sec^2(x)\,dx$

(g) $\int \frac{1}{\sqrt{9-x^2}}\,dx.$

(h) $\int x^2\sqrt{x+1}\,dx$

(i) $\int \frac{1}{(x+1)(x+2)^3}\,dx$

(j) $\int \frac{1}{(x+12)^4}\,dx$

(2) Evaluate the integral.

(a) $\int \frac{1}{\sqrt{x^2+9}}\,dx$

(b) $\int x\sqrt{x^2-5}\,dx.$

(c) $\int \frac{3x+5}{x^2-4x-5}\,dx$

(d) $\int e^{2x}\cos(x)\,dx$

(e) $\int \cos^2\theta\sin^2\theta\,d\theta$

(f) $\int \cos(x)\sin^5(x)\,dx$

(g) $\int \frac{1}{x(x-1)^2}\,dx$

(h) $\int \cos^2(4x)\,dx$

(i) $\int \frac{3}{(x+1)(x^2+x)}\,dx$

(j) $\int (\ln x+1)\sqrt{(x\ln x)^2+1}\,dx$
