Math Club Smorgasbord

Undergraduate Math Club
Cornell University

Speakers

Amogh Anakru, Nile Jones, Daniel Longenecker, Misha Molodyk, Jessie Tan

Abstract

Each speaker will give short talks. Come taste a variety of different topics!

AA: A fractal staircase helps us understand many physical phenomena.

NJ: Symmetry is adored by mathematicians, but did you know it’s loved by chemists too?

DL: Math inspires String Theory, and vice versa. We will explore some of these connections.

MM: We will solve a pendulum’s equation of motion exactly.

JT: Will we find another Mersenne prime?
