Education

- Dr. Scientiae in Mathematics, Academy of Sciences Berlin, Germany, 1990, Thesis "Contributions to Asymptotic Estimation Theory in Regression Models with Large Parameter Space"
- Ph. D. in Mathematics, Academy of Sciences Berlin, 1979, Thesis "Estimation of Linear Functional Relationships"
- M. Sc. (Diplom) in Mathematics, Humboldt University Berlin, 1973, Thesis "Maximum Likelihood and Least Squares Estimation of Linear Functional Relationships"

Occupations

- 8/99-present: Professor of Mathematics, Cornell University
- 1/92-8/99: Research Group Leader, Weierstrass Institute for Applied Analysis and Stochastics, Berlin
- 7/85-12/91: Senior Researcher, Karl Weierstrass Mathematical Institute, Berlin
- 8/73-6/85 Researcher, Academy of Sciences Berlin, Mathematical Institute

Visiting positions

- 6/01 : Institut Henri Poincaré, Paris, France
- 6-7/00 : National Research Center for Quantification and Simulation of Economic Processes (SFB 373), Berlin, Germany
- 5/98: Université Paul Sabatier, Toulouse, France
- 5/96: University of Leiden, Netherlands
- 11/95-12/95 University of British Columbia, Vancouver, Canada
- 3/95-4/95 Australian National University, School of Mathematical Sciences, Canberra, Australia
- 9/94 Institut National de Recherche Agronomique (INRA), Montpellier, France
- 3/90-4/90 Université Catholique de Louvain, Center for Operations Research and Econometrics (CORE)
- 10/89-12/89 University of California at Berkeley, Dept. of Statistics
- 3/89-4/89 University of Bonn, Dept. of Economics
- 9/80-11/81, 2/83-7/83, 9/84-6/85 Institute of Problems of Information Transmission, Academy of Sciences of the U.S.S.R., Moscow

Current Research Focus

My research program focuses on developing a better theoretical understanding of nonparametric statistical inference, using approximations when the sample size is large. A guiding principle is that complicated statistical models should be approximated by simple ones. This can be achieved within the theory of statistical experiments, using the concepts of local asymptotic normality and of Le Cam equivalence. Current efforts concentrate on models of dependent observations, such as stationary or locally stationary Gaussian sequences, with high or infinite dimensional parameter space. However there is also an interest in unsolved problems in the simple signal-plus-noise setting, such as sharp error asymptotics for adaptive nonparametric hypothesis testing.

Another line of research is quantum statistics, a field connected to recent progress in quantum computing and communication. Here the emphasis is on results for hypothesis testing and discrimination between quantum states, such as the quantum Chernoff bound.

Awards and Memberships

- Fellow of the Institute of Mathematical Statistics, 1998
- Lucien Le Cam lecture, French Statistical Society, 2003

Editing of Scientific Journals

- Associate Editor, *Annals of Statistics*, Institute of Mathematical Statistics, Hayward, CA, 1995-2000
- Associate Editor, *Annales de l'Institut Henri Poincaré, Probabilités et Statistiques*, Institute of Mathematical Statistics, Beachwood, OH, 1995-2013
- Associate Editor, *Statistics & Risk Modeling*, Oldenbourg Wissenschaftsverlag, Munich, 2003-present
- Associate Editor, *European Series of Industrial and Applied Mathematics (ESAIM), Probability & Statistics*, (Electronic Journal), Société de Mathématiques Appliquées et Industrielles, Paris, 1996-2000.

Publications

(see <http://www.math.cornell.edu/~nussbaum/papers.html> for papers available in electronic format)

- Attainment of the multiple quantum Chernoff bound for certain ensembles of mixed states. In: *Proceedings of the First International Workshop on Entangled Coherent States and Its Application to Quantum Information Science*, (Usuda, T.S., Kato, K., Eds.), Tamagawa University Quantum ICT Research Institute, Tokyo, Japan, 77-81 (2013). Also at *arXiv:1308.6563 [quant-ph]*
- (with I. Tecuapetla-Gómez) On large deviations in testing simple hypotheses for locally stationary Gaussian processes. *Statistical Inference for Stochastic Processes*, 15 (3) 225-239 (2012)
- (with A. Szkoła) An asymptotic error bound for testing multiple quantum hypotheses. *Annals of Statistics*, 39 (6) 3211–3233 (2011)
- (with A. Szkoła) Asymptotically optimal discrimination between multiple pure quantum states. In: *Theory of Quantum Computation, Communication and Cryptography. 5th Conference, TQC 2010, Leeds, UK. Revised Selected Papers*.

Lecture Notes in Computer Science, Vol 6519, van Dam, Wim; Kendon, Vivien M.; Severini, Simone (Eds.), pp. 1-8, Springer (2011)

- Discussion on: "Wavelet smoothing- Asymptopia ?" by D. Donoho, I. Johnstone, G. Kerkycharian, D. Picard, *Journal of the Royal Statistical Society, Series B*, 57 (1995), 348-349
- (with W. Härdle) Kernel estimation: the equivalent spline smoothing method. *Publications de l'Institut de Statistique de l'Université de Paris*, XXXVIII, fasc. 3, 61-86 (1994)
- (with G. Golubev) An adaptive spline estimator in the nonparametric regression model. *Theory of Probability and Applications* 37 (3) 554-561 (1992)
- (with W. Härdle) Bootstrap confidence bands. In: *Bootstrapping and Related Techniques*, Proceedings of an International Conference held in Trier, Germany, June 1990 (K. H. Jöckel, G. Rothe, W. Sandler, Eds., Springer Verlag, Berlin, 1992

- (with G. Golubev) A risk bound in Sobolev class regression. *Annals of Statistics* **18** 758-778 (1990)
- (with D. Donoho) Minimax quadratic estimation of a quadratic functional. *Journal of Complexity* **6** 290-323 (1990)
- (with G. Golubev) Nonparametric estimation of a regression function in L_2 (in Russian). *Problems of Information Transmission* **26** (3) 38-49 (1990)
- Some topics in nonparametric regression. In: *Regression, Functional Relations and Robust Methods* (H. Bunke, O. Bunke, Eds.), John Wiley, Chichester, 1989, pp. 105-125
- (with S. Zwanzig) A minimax result in a model with infinitely many nuisance parameters. *Transactions of the 10th Prague Conference on Information Theory, Statistical Decision Functions, Random processes*, Academia, Prague 1988
- On the nonparametric estimation of regression functions that are smooth in a domain of \mathbb{R}^k . *Theory of Probability and Applications* **31** (1) 118-125 (1986)
- Spline smoothing in regression models and asymptotic efficiency in L_2 . *Annals of Statistics* **13** 984-997 (1985)
- (with R. Z. Hasminskii) An asymptotic minimax bound in a regression model with an increasing number of nuisance parameters. In: *Asymptotic Statistics 2* (Kutna Hora, 1983), Elsevier, Amsterdam, New York 275-283 (1984)
- An asymptotic minimax risk bound for estimation of a linear functional relationship. *Journal of Multivariate Analysis* **14** (3) 300-314 (1984)
- Optimal filtering of a function of many variables in Gaussian white noise (in Russian) *Problems of Information Transmission* **19** (2) 23-29 (1983)
- (with H. P. Höschel) Models with errors-in-variables, in: *Regression, Functional Relations and Robust Methods* (H. Bunke, O. Bunke, Eds.), John Wiley, Chichester, 1989, pp. 214-415
- Capacity in the case of transmission by smooth surfaces in multiparametric Gaussian white noise (in Russian). *Problems of Information Transmission* **18** (4) 235-244 (1982)
- Asymptotic efficiency of estimators of a multivariate linear functional relation. *Mathematische Operationsforschung und Statistik*, Series Statistics **10** 505-527 (1979)
- (with H. Bunke) The structural distribution of parameters in linear functional models. In: *Statistical Inference in Linear Models* (H. Bunke, O. Bunke, Eds.), John Wiley, Chichester 1986, pp. 499-503
- Asymptotic optimality of estimators of a linear functional relation if the ratio of the error variances is known. *Mathematische Operationsforschung und Statistik* **8** 173-198 (1977)
- Asymptotic efficiency of estimators in the multivariate linear model. *Mathematische Operationsforschung und Statistik* **8** 439-445 (1977)
- Maximum likelihood and least squares estimation of linear functional relationships. *Mathematische Operationsforschung und Statistik* **7** 23-49 (1976)

Unpublished reports

- (with C. Butucea) Asymptotic equivalence of discretely observed geometric Brownian motion to a Gaussian shift. Discussion paper No. 59/1999, Sonderforschungsbereich 373, Humboldt University, Berlin 1999

- (with S. Pereverzev) The degrees of ill-posedness in stochastic and deterministic noise models. Preprint No. 509, Weierstrass Institute, Berlin 1999.
- (with J. Klemelä) Constructive asymptotic equivalence of density estimation and Gaussian white noise. Discussion paper No. 53, Sonderforschungsbereich 373, Humboldt University, Berlin 1998.

Organisation of professional meetings

- (*forthcoming*) New Horizons in Statistical Decision Theory. Seminar, Mathematical Research Institute Oberwolfach, organized jointly with M. Guta and R. Gill, September 2014
- Member of Scientific Committee, Stochastics Days 2000, Hamburg (German Open Conference on Probability and Statistics), March 2000
- Workshop on "Empirical Processes in Non- and Semiparametric Statistics", Berlin, September 1998 (Satellite Meeting of the International Congress of Mathematicians, Berlin, August 1998) (jointly with E. Mammen, Heidelberg)
- Member of Local Scientific Committee, International Congress of Mathematicians, Berlin, August 1998
- Organizer of an invited paper session on Asymptotic Statistics, Stochastics Days 1998, Munich, March 1998 (German Open Conference on Probability and Statistics)
- Workshop on "Asymptotic Methods in Stochastic Dynamics and Nonparametric Statistics", Berlin, September 1996 (Satellite Meeting of the 4th World Congress of the Bernoulli Society, Vienna), (jointly with E. Mammen)
- Organizer of an invited paper session on "Convergence of Experiments", Annual Meeting of the Institute of Mathematical Statistics, Chicago, Illinois, August 1996
- Seminar on Mathematical Statistics Paris-Berlin "Complex Models in Nonparametrics", Berlin, September 1995 (jointly with E. Mammen, Heidelberg))
- Organizer of an invited paper session on Inverse Problems, 21st European Meeting of Statisticians, Aarhus, Denmark, August 1995
- Workshop on Stochastics and Finance, Berlin, September 1994 (jointly with U. Küchler et al.)
- Seminar on Mathematical Stochastics, Oberwolfach, March 1994 (jointly with A. Wakolbinger)

Presentations

- First International Workshop on Entangled Coherent States and Its Application to Quantum Information Science, Tokyo, Japan: Asymptotic error rates in quantum discrimination (November 2012)
- 10th German Probability and Statistics Days, Mainz: Asymptotic error rates in quantum hypothesis testing (March 2012)
- Statistics and Modeling for Complex Data, Marne-la-Vallée, France: An asymptotic error bound for discriminating between several quantum states (June 2011)
- Princeton University, Dept. of Operations Research and Financial Engineering: Asymptotic Error Rates in Quantum Hypothesis Testing (December 2010)
- European Meeting of Statisticians, Toulouse, France: Asymptotic Error Rates in Quantum Discrimination (July 2009)
- Yale University, Dept. of Statistics: The Chernoff lower bound for symmetric quantum hypothesis testing (December 2007)

- Asymptotic Analysis in Stochastic Processes, Nonparametric Estimation and Related Problems, Wayne State University, Detroit: An asymptotic error bound for symmetric hypothesis testing in quantum statistics (September 2006)
- Technical University Berlin: On the problem of symmetric hypothesis testing in the quantum case (July 2006)
- University of Heidelberg, Germany: Asymptotic equivalence of spectral density estimation and signal recovery in Gaussian white noise (July 2006)
- ETH Zurich, Switzerland: Asymptotic equivalence of spectral density estimation and Gaussian white noise (April 2006)
- Technical University of Kaiserslautern: Asymptotic statistical equivalence for models of stochastic processes (April 2006)
- University of Uppsala, Sweden: Asymptotic statistical equivalence for models of stochastic processes (January 2006).
- Dynstoch Workshop 2004 (“Statistical Methods for Dynamic Stochastic Models”), Copenhagen: Asymptotic equivalence of spectral density estimation and Gaussian white noise (June 2004)
- AMS Fall Eastern Sectional Meeting, Binghamton, NY: Asymptotic equivalence of spectral density estimation and Gaussian white noise (October 2003)
- Lucien Le Cam lecture, 35èmes Journées de Statistique, Lyon, France: Equivalence asymptotique des expériences statistiques (June 2003)
- University of Connecticut, Storrs, Dept. of Statistics: Asymptotic equivalence of spectral density estimation and Gaussian white noise (October 2002)
- University of Pennsylvania, Philadelphia, Dept. of Statistics: Asymptotic equivalence of spectral density estimation and Gaussian white noise (April 2002)
- Colloquium in Honor of Jean Bretagnolle, Didier Dacunha-Castelle and Ildar Ibragimov, Orsay, France: On smoothness conditions for asymptotic equivalence of experiments (June 2001)
- "Nonparametric function estimation, neural nets and risk asymptotics" , summer course at Math. Institute Oberwolfach , Germany (DMV-Seminar), jointly with Andrew Barron (Yale), Laszlo Györfi (Budapest) (June 2000)
- “Statistics and Finance”, Oberwolfach, Germany: Asymptotic equivalence of statistical experiments: recent developments (March 1999)
- Cornell University, Ithaca, Dept of Mathematics: Asymptotic equivalence of experiments (February 1999)
- University of California at Berkeley, Dept. of Statistics: Minimax prediction of time varying volatility (January 1999)
- University of California at Berkeley, Dept. of Statistics: Asymptotic equivalence of experiments (January 1999)
- Yale University, Dept. of Statistics: Asymptotic equivalence of experiments I, II (January 1999)
- Workshop "Statistical Inference for Stochastic Processes II", Le Mans, France: Constructive asymptotic equivalence of density estimation and Gaussian white noise (December 1998)
- Université Paul Sabatier, Toulouse, France: Equivalence asymptotique des expériences statistiques: processus Gaussiens stationnaires et aspects constructives (May 1998)
- Workshop "Statistical Inference for Stochastic Processes", Paderborn, Germany: Likelihood approximation for a nonparametric birth process (April 1998)
- ISI Satellite Meeting "Mathematical Statistics and its Applications to Biosciences", Rostock: Asymptotic equivalence of nonparametric experiments given by stochastic processes (September 1997)

- Michigan State University, East Lansing, Michigan: Asymptotic equivalence of statistical experiments (August 1997)
- IMS Annual Meeting, Park City, Utah: Gaussian white noise approximation for some nonparametric models of counting processes (July 1997)
- Workshop "Statistical Inference for Stochastic Processes", Rennes, France: Asymptotic equivalence of a nonparametric spectral density model to Gaussian white noise (April 1997)
- Workshop "The Art of Nonparametric Statistics: Methodologies and Applications", Louvain-la-Neuve, Belgium: Asymptotic equivalence of counting process experiments and Gaussian white noise (February 1997)
- Vienna University of Economics, Austria: Asymptotic equivalence of experiments: results and problems (December 1996)
- Ecole Normale Supérieure, Paris: Asymptotic equivalence for counting process experiments via Skorokhod embedding (December 1996)
