

CHELLURI LECTURE

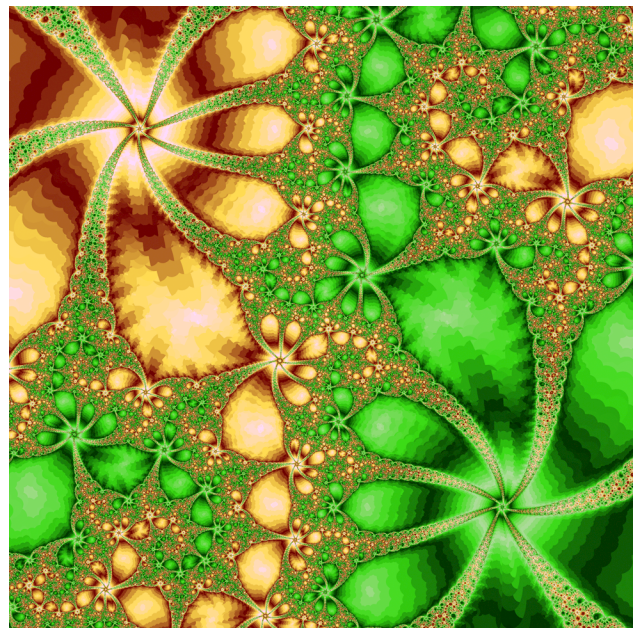

A special Oliver Club offered in memory of Raju Chelluri

Laura DeMarco, University of Illinois at Chicago
and Northwestern University

Numerical Patterns and Chaos

From the Fibonacci numbers to the Mandelbrot set, we will explore patterns of prime numbers and their connection to chaotic dynamical systems.

This talk is intended for a general audience, with no mathematical background necessary.

Following the lecture, a musical performance and reception will be held at A. D. White House.

Thursday, April 10, 2014 at 4:30 PM in 251 Malott Hall

The Chelluri Lecture series is offered in memory of Thyagaraju (Raju) Chelluri, a brilliant student, gifted scholar, and wonderful human being who graduated magna cum laude in mathematics from Cornell in 1999 and was awarded a Ph.D. posthumously from Rutgers University in 2004.
