

Hausdorff Measure Calculation for the Standard Basilica $c = -1$

Taryn Flock

June 5, 2009

For the basilica, $c = -1$, we approximate $d = 1.2683$:

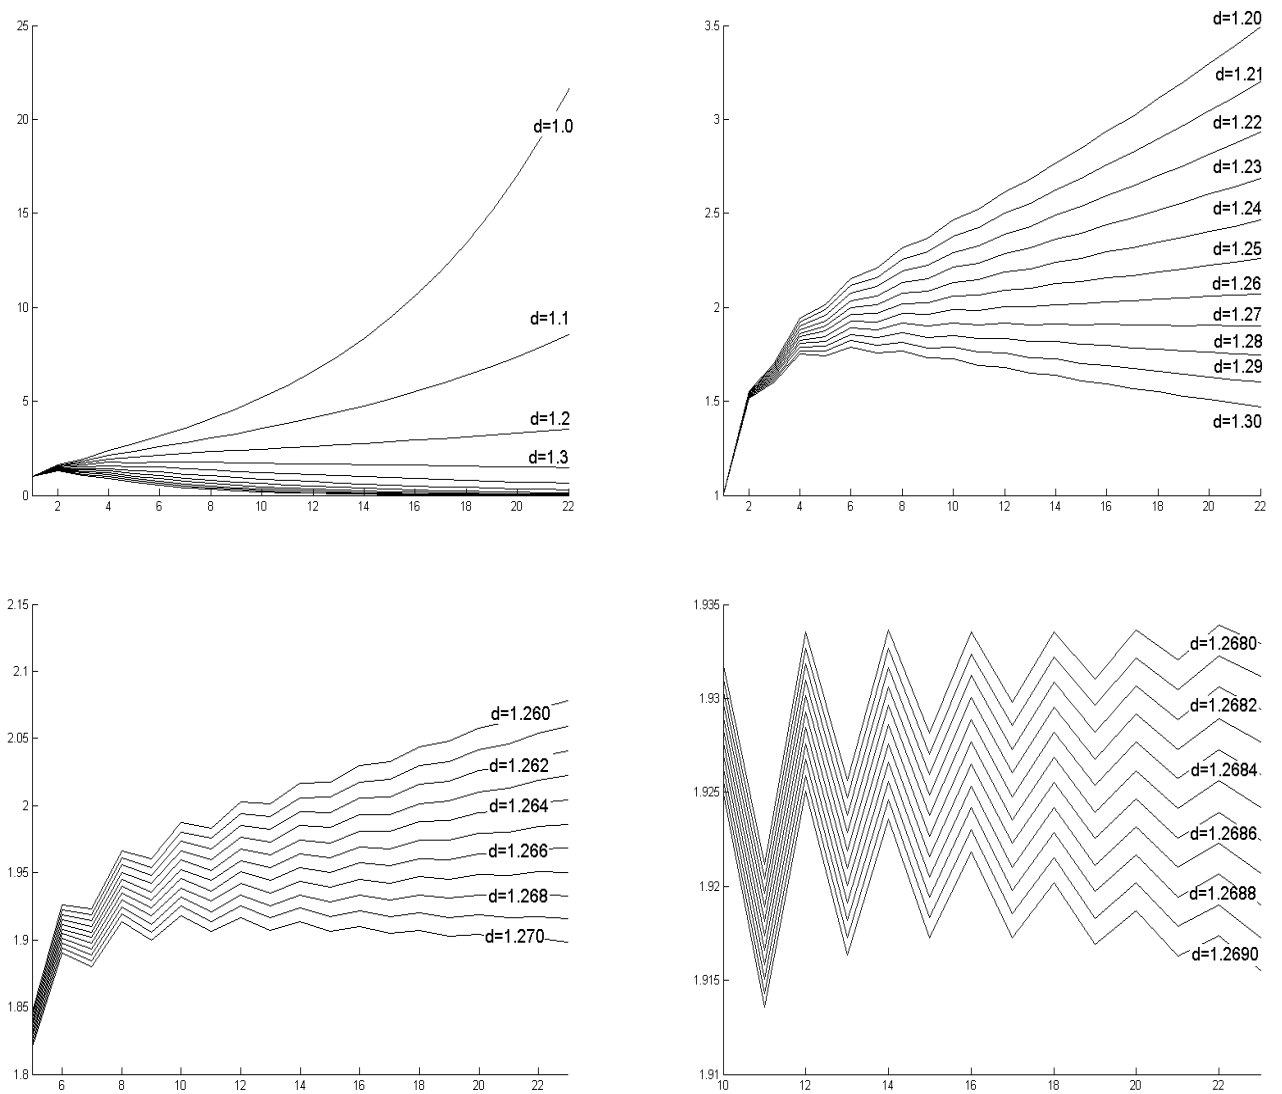

Figure 6.3: $c = -.1$

Top Left: d ranges 1-2 in increments of .1

Top Right: d ranges 1.2-1.3 in increments of .01

Bottom Left: d ranges 1.26-1.27 in increments of .001

Bottom Right: d ranges 1.268-1.269 in increments of .0001
