

Hausdorff Measure Calculation for a variant  
Basilica  $c = -1 + .15i$

Taryn Flock

June 5, 2009

Next we examine  $c = -1 + .15i$  and estimate  $d = 1.3052$

**Figure 6.4:**  $c = -1 + .15i$

**Top Left:**  $d$  ranges 1-2 in increments of .1

**Top Right:**  $d$  ranges 1.3-1.4 in increments of .01

**Bottom Left:**  $d$  ranges 1.30-1.31 in increments of .001

**Bottom Right:**  $d$  ranges 1.305-1.306 in increments of .0001
