ERRATUM TO: ON THE SUP NORM OF MAASS CUSP FORMS OF LARGE LEVEL, SEL. MATH. NEW SER. (2010)

- In the statement of the Lemma 6.1 on p.526 the condition should read $L \ll N^{1/3-3\epsilon}$. The mistake comes from the first sentences of the proof (the rest of the proof is ok). The sentence “Thus, enlarging the $A$, it is sufficient to prove...” shouldn’t be there. I should have written instead:

  The $F$-linear span generated by the lattice points $\gamma$ satisfying (6.1) is proper as soon as $L \ll N^{2/3}$. Thus the $F$-subalgebra generated by the same lattice points is proper as soon as $L \ll N^{1/3}$.

- As a consequence the estimate in Theorem 2 should be revised into

  $$\|f\|_\infty \ll_{T,\epsilon} N^{-1/24+\epsilon}.$$
