10%	$6/12=.5$
20%	$3/12=.25$
40%	$2/12=.17$
100%	$1/12=.08$

(6) Chance that at least one of the first six shoppers gets less than a 100% discount?

Hard b/c could be 1 or 2 or ...

$$P(0 \text{ get less than } 100\%) = P(\text{all } 100\%) = \left(\frac{11}{12}\right)^6.$$

So complement rule says answer to (6) is $1 - \left(\frac{11}{12}\right)^6$.
